THE REAL BOOK B♭ III

Well, it's here at last -- REAL BOOK III. It has been a l-o-n-g time coming. In fact, several years have transpired during its' preparation. What is new about it?

First, the obvious use of a computer generated music notation software, which makes for a very readable lead sheet. It has been proofed by professional musicians. We make no claims as to 100% accuracy, just that we have done our best to catch as many errors as possible. We apologize for any we have missed and will try to correct any of our goofs in future editions.

There are many standards included here, all of which make great vehicles for jazz as well as "straight" gigs. All songs have lyricist and composer listed and the style also. However, many can be performed in other styles or tempos. Feel free to experiment on your own. Swing rhythms have been used for the jazz tunes, but some of the standards have been notated in their original non-swing form. This should not present problems for any but the beginning jazz player, who will benefit from the learning experience.

We know that you will find the quality of the selected tunes to be exceptionally high. Thanks to all the guys who contributed tunes and made many valuable suggestions. Special thanks to Bob for his contributions and patience while proofreading this collection.

ENJOY!
